Environment

Environment means all the natural surroundings such as land, air, water, plants, animals, solid material, wastes, sunlight, forest and other things. Healthy environment maintains the nature's balance as well as helps in growing, nourishing and developing all the living things on the earth. However, nowadays, some manmade technological advancement into many ways which ultimately disturbs the balance or equilibrium of nature. We are keeping our lives in danger as well as existence of life in future on the planet.

If we do anything in wrong way out of the discipline of nature, it disturbs the whole environment means atmosphere, hydro-sphere and lithosphere. Besides natural environment, a manmade environment, aesthetics, transportation etc. Manmade environment affects the natural environment to a great extend which we all must be together to save it. The components of the natural environment are used as a resource however it is also exploited by the human beings in order to fulfil some basic physical needs purpose of life.
